

THE **FACTS** BEHIND HEALTHSOURCE CHIROPRACTIC.

With more than 300 clinics coast-to-coast, HealthSource has become a leader in chiropractic by combining modern chiropractic care with Progressive Rehab® and Wellness to keep patients in the best health of their lives. We not only focus on back pain, neck pain, headaches, sciatica, fibromyalgia and other common issues, but also on prevention and nutrition.

1

WORLDWIDE LEADER IN CHIROPRACTIC

More than 8 Million HealthSource patients have safely received cervical and spinal manipulations throughout the country providing patients relief from back pain, neck pain and headache, and helping them get back to their normal activities.

2

EDUCATION AND EXPERIENCE

Did you know that like their MD and DO counterparts, Doctors of Chiropractic are required to complete at least 8 years of schooling, including undergraduate and doctorate degrees. They also must be board certified and licensed in their respective state of practice.

3

SAFE & EFFECTIVE

Chiropractic care is typically painless and incredibly safe and effective at getting patients out of pain. We have some of the lowest malpractice insurance premiums in health care because of the low risk associated with our treatments.

4

THOROUGH EXAMINATIONS

HealthSource patients receive a thorough exam, which often includes X-rays and a comprehensive report of findings to rule out any pre-existing conditions that require special attention.

5

INNOVATIVE CARE

In addition to Chiropractic care we also provide Progressive Rehab®, which restores the strength of your body to help you gradually return to everyday activities.
